PROJECTS

Netflix Landing Page Clone : | LINK

Technologies Used: HTML, CSS, jQuery
- Designed and developed a fully responsive Netflix landing page clone to showcase strong front-end development skills.
- Utilized HTML for structure, CSS for styling and responsiveness, and jQuery.
- Focused on pixel-perfect design, cross-browser compatibility, and mobile-first approach.

Tourista - Tours & Travels Static Website : | LINK

Technologies Used: HTML5, CSS3, Bootstrap 5, JavaScript, jQuery, WOW.js, Owl Carousel
- Developed a responsive travel website using HTML5, CSS3, Bootstrap, and jQuery. Implemented interactive features like animated menus, carousels, and scroll animations, enhancing user experience.
- Integrated third-party libraries like Owl Carousel for customer testimonials and WOW.js for scroll animations, enhancing user engagement.
- Built dynamic content display sections with tour package details, highlights, and real-time booking options.

Freightica - Import and Export Static Website | LINK

Technologies Used: HTML5, CSS3, Bootstrap 5, JavaScript, jQuery, WOW.js.
- Developed the front-end of Freightica, an import and export website, focusing on responsive design, user-friendly navigation, and seamless integration of features like service sections, customer reviews, and blogs.
- Implemented interactive UI components for service selection, freight package comparison, and client feedback.

CERTIFICATES

Introduction to Front-End Development (Meta) : | LINK **November 2023**
- Gained expertise in HTML, CSS, responsive web design, and front-end development tools.
- Developed skills in creating user-friendly interfaces and optimizing for diverse devices.
